1. Introduction

For millions of people, Practo is the trusted and familiar home where they know they will find a healing touch. Practo is an online health consultation website that provides online healthcare. We are taking and testing the following functionalities of the website www.practo.com :

1. Retrieving the hospital list after entering location as "Bangalore", keyword as "hospital" and adding filters for "Open 24x7" & "Has Parking" facilities

2. Retrieving the Top Cities list after entering the Diagnostics webpage

3. Retrieving the alert message after entering invalid details in the Corporate Wellness webpage & scheduling a demo.

1.1 Intended Audience

- Business Unit (BU) SME
- Academy coach
- Technical Trainer

1.2 Project Scope

This document defines at a functional level the business activities that are encompassed by the system and the rules that apply to them. It also encompasses some of the key high- and low-level technical requirements of the system.

It draws heavily on both proposed Framework and Business Rules and the Technical Architecture documents. The scope of the detailed analysis project phase specifies that this document will include.

- Classification of requirements according to their functional areas.
- A description of each process in the system, including their inputs, outputs, and data transformation rules.

2. Overall Description

2.1 Operating Environment

- Windows operating system
- Web application

3. Requirements

3.1 Description
